The 27th ITS World Congress in Los Angeles, CA, October 4-8, 2020 will explore “The New Age of Mobility”. The recent explosion of new technologies and new forms of mobility are transforming the future of transportation. At a time in which we are focused on moving people, data and freight, how will we prepare for a future that is increasingly more connected, automated, shared and electric? The technologies that make our roads safer will also reduce congestion and greenhouse gas emissions, and move us closer to a future of seamless mobility — one that is safer, greener and smarter.
